

PACS PRO 17

Specification sheet

SNR 17

The PACS Pro17 custom earplugs have the flattest response filter in the PACS Pro range. Designed specifically for musicians and vocal performers, the PACS Pro17 gives one of the most accurate responses of any hearing protector with flat 17dB protection across the board. Because of its performance it is also used in industries with noise levels up to 102dB where conversation is important.

The most versatile and natural sounding hearing protector in the world. The standard for amplified musicians, DJ's, vocalists, sound engineers, clubbers and in aviation.

PACS Pro 17 is for anyone who needs a clear response and hearing, plus flat attenuation in noise levels up to 102dB.

PACS Pro 17 (and/or differently branded equivalents with the exact same specs) has been tested and certified to meet the European standard for hearing protectors, EN352-2.

Acoustic Specification

Minimum guaranteed damping level (dB)	125 Hz	250 Hz	500 Hz	1 kHz	2 kHz	4 kHz	8 kHz	H	M	L	Class SNR
EN352-2	18	18	16	16	15	17	17	16	16	16	SNR 17

Attenuation Curve

Weight	3g Net 83g Gross Average weight will vary according to ear size

PACS Pro 17 the most versatile filtered custom product

The most versatile and natural sounding hearing protector in the world. For industry: Medium level of protection in a custom single canal mould which offers you the comfort and freedom to wear it for long a period of time. For aviation: The volume produced by aircraft will exceed the safe level of 85dB easily, but also the lower levels of noise from engines and rotors etc. can have damaging effects. Aviation crew need to communicate and protect their hearing at the same time. Musicians: Whether you are a stage performer or a concertgoer, the PACS Pro 17 has a very flat attenuation and little occlusion which makes this the perfect earplug for music lovers.
